- Premium control module for variable speed fans and brushless motors available for the latest applications.
- Licensed Bosch and Siemens VDO shroud and blade patents (select applications) generate a higher rate of air flow (cubic feet per minute) with less wattage draw.
- Rotationally-balanced fan blades without the use of weight-balancing clips ensure smooth spinning and longevity of the fan assembly.

DELIVERED AT THE CONCLUSION OF
PROMO. WHILE SUPPLY LASTS.

\$5.00 EA KIT

COMPLETE SERPENTINE KITS

Why Kits?:

They get to the root of the problem. A worn or noisy belt is only part of the issue. A complete serpentine repair is the only way to do the job right.

- Tensioners wear at the same rate as the belt
- Without proper tension, even the best new belt can't efficiently transfer power
- A worn tensioner can make a new belt wear up to 2x faster
- Loose parts take more time to source
- Performing a complete system repair doesn't add much time, but adds a lot of value (and protects against comebacks)
- **Lifetime Manufacturer Parts + Labor Warranty (ask for details)**

NEW GCX! THE WORLD'S FIRST APPLICATION-SPECIFIC ROTORS! Innovation. You're either creating it or following it. Here at Centric, we treat innovation as our daily responsibility to you, our valued customers. Centric's new GCX rotor solutions are the first in the Industry to deliver Application-Specific metallurgy combined with our RS200 corrosion protection. First, Centric identifies the OE metallurgy and ensures our GCX metallurgy matches the OE. Next, we apply RS200 corrosion protection in a friction-specific pattern to work in harmony with both adherent and abrasive friction formulations making GCX the perfect OE replacement!
