REWARD CARD**

RESTORE OE-VEHICLE CONTROL AND RIDE HEIGHT

If it doesn't say Monroe Quick-Strut, it's not a Quick-Strut assembly. This is not a one-size-fits all replacement. Featuring coil springs made with U.S. grade steel, every vehicle specific design is engineered and validated to Monroe quality standards to help restore factory ride height and original vehicle ride performance.

- **Quality Components** – Strut rods are engineered to bend up to 15mm with no fractures or cracking
- **Made To Last** – Manufactured with high-quality steel, featuring a superior tube and weld design to deliver structural integrity and durability
- **Quicker, Safe, Easier & Complete Repair** – Includes everything you need for strut replacement in a single, fully assembled unit with no need for a spring compressor
- **Vehicle-Specific Design** – Application-specific coil spring, mount, and strut designs ensure optimized ride and handling experience unique to each vehicle profile
- **Maintains Vehicle Control** – Reduces body sway, vibration, and road harshness before it reaches the passenger cabin for improved vehicle handling
- **Rust Resistance** – Protective coating resists rust out and corrosion while salt spray testing ensures it's ready for the elements
- **Assembled in USA** – Products assembled in Paragould, Arkansas from U.S. and imported components

Radiator Fan Assemblies

Original engine cooling fans often burn out prematurely because they're under engineered for extreme duty. Dorman OE FIX solution features a brushless motor and more durable fan blade to dramatically extend service life under intense use.
