BOSCH

Invented for life

Premium Oxygen (O2) Sensors

Bosch is the world's leading supplier and original equipment manufacturer of Oxygen Sensors. Bosch invented the automotive oxygen sensor and leads the way in sensor technology and innovation.

From overall sensor design to the critical ceramic element, Bosch is known worldwide for quality and performance.

YOUR REWARD CARD REBATE

\$5.00 EACH

Simply order from Allied using our [WebShop Online Ordering System](#).

You will be rebated at the conclusion of the program.

All promotions are subject to change or modifications.

Monthly Gift Card Monetary Rebates will accrue and be issued at \$30 and above.

All WebShop promotions are capped, meaning they will end early if funds are exhausted.

DORMAN CONTROL ARMS

MATERIALS

- Highest quality materials and components utilized for enhanced service life

DESIGN ENHANCEMENTS

- Advanced polymer bearings provide ultra-low friction and long life.
- Metal-on-metal designs used to match OE designs, keeping consistent performance.

MAINTENANCE-FREE SEALED DESIGN.

-  Graded hardware provides simple installation and reliable connection.
-  Performance-rated boot, tested to ensure protection from contaminants.
-  EverSmooth™ Ball Finish - A smoother ball surface means less wear and increased durability for polymer-bearing sockets, when OE specified.
-  Dorman-engineered polymer bearing provides smooth movement with a high tolerance of temperature extremes, without requiring regular maintenance.
-  Weather-tight sealing coin prevents moisture and debris from contaminating housing.
-  I.C.E.™ Grease - Our premium I.C.E.™ (Intelligent Chassis Engineered) grease is an OE-approved formulation that ensures maximum performance even in extreme temperatures.

DORMAN PREMIUM EXTENDED LIFE CHASSIS PARTS

Premium
Extended Life Chassis Parts™

EXTENDED LIFE TECHNOLOGY

Dorman utilizes XL technology to meet the exacting performance requirements on today's most popular vehicles, each denoted by an "XL" suffix on the part number

Low friction bearings maintain a vehicle's original steering and handling without adding resistance to the steering or suspension systems

Features high-quality components designed for ease of installation while restoring vehicle to like new condition

Maintenance-free design

**We optimize
every component**

PREMIUM ADVANTAGES

EXCLUSIVE ARMOURGRADE™ STUDS

ArmourGrade coating provides corrosion resistance against harsh environments

EXCLUSIVE EVERSMOOTH™ BALL FINISH

EverSmooth Finish reduces the amount of torque required to move the stud and contributes to increased durability

EXCLUSIVE ULTRAFLOW™ NORMALIZED FORGED HOUSING

UltraFlow Housing insures small material grain size and maximizes part durability

DORMAN PREMIUM BALL JOINTS

ELEMENT3™ AUTOMOTIVE BRAKE PADS

Element3 Automotive Brake Pads are the ultimate line of automotive brake pads. As the best, the EHT™ Enhanced Hybrid Technology and professional grade formulations offer a comprehensive array of brake pads for exceptional performance.

Features:

- Application-specific formulas for quiet operation and superior stopping power
- Premium multi-layer shims and stainless steel hardware for maximum noise damping
- Domestic and import applications
- Late-model coverage
- Compliant to all environmental copper regulations

ProMax Brake Rotors and Drums are manufactured using G3000 material and deliver outstanding, durable braking performance. Each rotor and drum is engineered, precision machined and performance tested to meet or exceed the form, fit, and function of the vehicle's original manufacturer specifications. ProMax Brake Rotors and Drums provides superior coverage to meet the market demands for domestic and foreign cars and trucks. ProMax Brake Rotors feature painted hats and edges

Delphi Technologies

MAF Sensors

Some Things Are Better New.

Choose Delphi Technologies for MAF

That's why every mass air flow sensor we make — whether with or without the housing — is built with calibrated all-new components and is never remanufactured. Delphi Technologies MAF sensors are designed and tested to meet or exceed OE requirements. They are engineered for a perfect fit in more than 134 million vehicles on the road today in North America — including Ford, Toyota, Nissan, Volkswagen, Hyundai, BMW, Honda, GM, Mazda, Subaru, Acura and more.

Built with all-new components, never remanufactured

- ✓ All parts are tested and calibrated to OE standards using highly accurate OE equipment.
- ✓ By testing to OE specifications, Delphi Technologies ensures that the sensors provide accurate readings and airflow output, which helps to reduce comebacks.
- ✓ Delphi Technologies MAF sensor designs provide low restriction air measurement for increased horsepower.

What is a MAF sensor?

- ✓ A mass air flow (MAF) sensor, also known as an "air meter," measures the air coming into the intake system and transmits this information to the ECM.
- ✓ The ECM utilizes the MAF sensor output signal to precisely schedule fuel injection, creating an optimal air-fuel ratio.
- ✓ This results in reduced emissions and improved fuel economy, all while maintaining drivability.

Why do MAF sensors fail?

- ✓ Contamination; as air, dirt and other debris get into the sensor, the parts become contaminated and fail.
- ✓ Drivers often notice sluggish performance, rough idling or even stalling. There may also be more frequent need to refuel.
- ✓ Many remanufactured MAFs are simply cleaned and tested, so all debris or contamination on the sensor may not be completely eliminated. Because of this, the ECM could still receive inaccurate readings and the vehicle may still experience sluggish performance.

Delphi Technologies MAF sensors are sold in two ways:

- ✓ A complete unit including the flow tube.
- ✓ A probe-only design, which provides a greener, more cost effective and often faster option.

Delphi Technologies MAF sensor probe allows technicians to focus on the part that needs replacement.

- ✓ The electronics on a sensor probe fail 98% of the time. Replacing the probe is quicker than replacing the plastic housing.

Bring the benefits of Mass Air Flow Sensors from Delphi Technologies to your shop. Contact your Delphi Technologies sales representative to stock up today.

ASK ABOUT OUR GREAT WIPER BLADE PROGRAMS

DORMAN VALVE COVERS

EXACT FITS FOR MILLIONS OF VEHICLES.

When you need a new valve cover, Dorman has you covered, with more valve covers for more vehicles than anyone else in the aftermarket.

As valve covers have evolved in complexity, Dorman has led the way with new replacement solutions for original equipment. Today we have dozens of exclusive products covering more than 65 million vehicles in operation, including new designs with integrated PCVs and other modern features.

"It's our job to give you a complete, confident repair with every Dorman valve cover"

Randy Zahonchek, Product Manager

Rigorously tested – we perform precise dimensional measurement, third-party material testing, and 500-mile long-term on-vehicle testing to ensure no leaks or oil consumption

Reliable solutions – each cover is designed to match the OEM fit and withstand extreme temperatures for durable performance

Limited lifetime warranty
